

Introducing our Computer Assisted Coding

MedKoder's CAC streamlines coding and eliminates bottlenecks because we offer much more than software. This is because we couple the technology with our top of the line service and offer an all-encompassing solution.

How does it work?

Our CAC technology will interface directly with your EHR, and adds preliminary diagnostic and procedural codes. Then, our best-in-class coders perform final validations. Our CAC includes payer specific logic (ie, medical necessity, CCI, MUE, etc) as well as validation checks and in return, you get a fully finished product ready to bill. In addition, our technology offers a real time, fully transparent dashboard so you can check on our progress and stay up-to-date on all of your coding.

Month/Qtr 2015	Count	Charges
January	5348	\$ 1,232,814.00
February	5146	\$ 1,241,582.00
March	5637	\$ 1,323,517.60
April	2216	\$ 472,130.00
May	2700	\$ 717,522.00
June	2442	\$ 619,294.00
July	1052	\$ 292,159.00
Total	24541	\$ 5,899,018.60

How does it fit in with ICD-10 implementation?

Because ICD-10 will change the structure of coding, now is a great time to get ready and start utilizing MedKoder's CAC. This is because documentation will be increased which means more pages will need to be reviewed and our technology can help accelerate **perpetrations** for launch and keep productivity steady, if not improved after implementation.

How long will it take to get started?

Since our technology is fully remote, all we need to do to get started is interface with your EHR of choice. Typically, this can be done as quickly as **2-4 weeks** and you are live and ready to start coding.

Results

The positive impact of utilizing MedKoder's CAC can be seen within days of going live and can be as high as **50%**. For instance, our technology can take your coding capabilities from 8-10 encounters up to 20 encounters per hour. All of this is done with superior accuracy and greater coding consistency, and quality. As you know, more detailed and accurate billing generates **more revenue**, so don't delay and contact us for more information.
